PROFILE

Software Developer with 1+ years of experience building cloud-native, IoT-enabled, and security-focused systems. Strong in full-stack development, event-driven architecture, CI and AWS infrastructure, with a focus on reliability, scalability, and regulated environments.

EXPERIENCE

Blackfrog Technologies Pvt. Ltd.

Aug. 2025 – Present

Software Engineer (Backend & IoT Systems)

Manipal, Karnataka

- Developing backend services for medical device monitoring platforms using Node.js, MongoDB, Express.js, and RabbitMQ.
- Integrated SMS, IVR, and Email alerting solutions using Twilio and telecom platforms while supporting TRAI DLT compliance requirements.
- Contributed to Flutter-based BLE applications for communication with embedded sensor devices and real-time telemetry visualization.
- Worked with AWS, Docker, GitLab CI/CD, SonarCloud, Nginx, and SSL management for deployment and production support.

EDUCATION

Manipal Institute of Technology, Manipal

Karnataka, India

Master of Computer Applications (GPA: 8.83)

Aug. 2023 – July 2025

Bhandarkars' Arts and Science College, Kundapura

Karnataka, India

Bachelor of Computer Applications (CGPA: 9.13)

Aug. 2020 – June 2023

Viveka PU College, Kota

Karnataka, India

Pre-University (Percentage: 91.50%)

June 2018 – Mar. 2019

Bearys Seaside Public School, Kodi

Karnataka, India

SSLC (Percentage: 95.36%)

June 2016 – Mar. 2017

PROJECTS

RTM Engine - Medical Device Monitoring Platform | Node.js, MongoDB, RabbitMQ

- Developed backend services for processing real-time telemetry data from medical devices and IoT sensors.
- Built RabbitMQ-based event processing workflows for alerts, device management, and monitoring operations.
- Implemented SMS, IVR, and Email notification services for critical healthcare monitoring alerts.

Sprintly - Project Management Tool - MERN Stack

- Sprintly is a project management tool developed by a team of four using the MERN stack to streamline task management and tracking.
- Enables task assignments, real-time progress tracking, and team collaboration with role-based access, secure authentication, automated notifications, task prioritization, and modern management views like KPIs.
- Built using the MERN stack with Tailwind for styling, JWT for authentication and authorization, a basic REST API for database operations, and Amazon S3 for file management.

SKILLS

Programming Languages: JavaScript, Node.js, Java, C/C++, SQL

Backend Development: Node.js, Express.js, REST APIs, RabbitMQ

Frontend & Mobile: Flutter, React.js, HTML, CSS, Bootstrap

Databases: MongoDB, MySQL, Firebase

Cloud & DevOps: AWS EC2, Docker, GitLab CI/CD, SonarCloud, Nginx

IoT & Communication: Bluetooth Low Energy (BLE), Telemetry Systems, SMS, IVR, Email Alerting

Tools: Git, VS Code, Android Studio, Postman, MongoDB Compass

Compliance & Quality: TRAI DLT, FDA 21 CFR, Technical Documentation

CERTIFICATIONS

- Writing Java Application Code
- HTML, CSS, and JavaScript for Web Developers
- Web Development Internship Certificate
- Android Application Development
- Mathematical Thinking in Computer Science
